

What's New in Operoo

New Digital Blue Cards

Operoo empowers schools to automate and manage operational processes with digital workflows for parents, staff and students. And, when it comes to managing student safety and wellbeing, nothing is more important. That's why we're updating our Digital Blue Card to ensure authorized staff, caregivers and parents have universal access to the fullest range of student health information possible; anywhere, anytime, from any device.

Operoo's updated Digital Blue Card is designed to complement the announcement from the New York City Department of Education (NYCDOE) regarding the capture of student medical data in the Emergency Contact Report (RCON) within its Automate The School (ATS) administration system.

The NYCDOE has introduced a new way for parents and guardians to update emergency contact and student health information via their official NYC Schools Account (NYCSA). We have been expecting and welcome this positive step towards digitization, which allows parents / guardians to append data throughout the school year.

Operoo's overhauled Digital Blue Card works alongside this NYCDOE initiative, enhancing the digital experience for school staff and caregivers alike.

Here is a summary of the new benefits provided:

Auto Sync from ATS

RCON data in ATS automatically synced to digital Blue Cards in Operoo.

Single Source of Truth

Operoo-entered and ATS-entered data is displayed in one unified view within Operoo.

Visual Data Analysis

All ATS emergency contact and medical data visually displayed, enabling easy analysis.

Blue Card Change Alerts

Verify time-stamped changes in real-time, made to any Operoo Blue Card, against ATS data.

Field Lockdowns

Lock-down any Blue Card fields to prevent parents from making unwanted changes.

Reconciliation Report

Pinpoint any differences between data held in Operoo and ATS.

Track ATS Imports

Know when the latest data import from ATS occurred with date-stamped logs.

Extra Care Information

Add or update data and documents not included in NYCSA: Orders of Protection, new custodians and more.

Create Action Plans

Users can now create and update Medical Action Plans to support students with severe conditions.

Trigger-based Workflows

Automatically distribute follow-up comms and request documents, such as Court Orders or Proof of Residence.

Automated Re-verification

Automatically ask parents / guardians to re-verify all Blue Card information every six months.

Mobile-ready Format

Easily view Blue Cards and take action on-the-go, during dismissals or emergencies, straight from your cell phone.
