Our Mission

How we help schools

- Operoo empowers schools to use every minute and every dollar possible on student education, rather than wasting resources on operational inefficiencies.

Use a template or
make any form

Add any
approval workflows

Automatically
distribute to
your audience

Responses received
within minutes

Trigger follow-up action
based on responses
received

Securely collect consent,
payment, medical info or any
other data required

Automated reminders
sent to stragglers

Track, analyze and
act on responses

Achieving Your Operational Goals

Faster and easier student enrolments and transitions

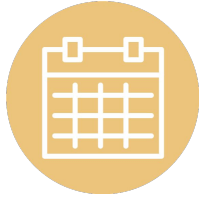

Digital school forms, consents and signatures

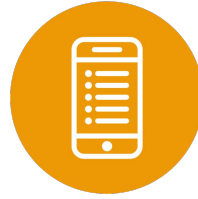

Up-to-date and accessible health & medical information

Digital payments and ordering

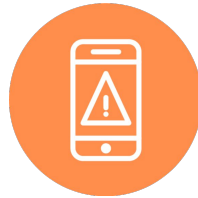

School trip and activities management

Staff requests, approvals and policy management

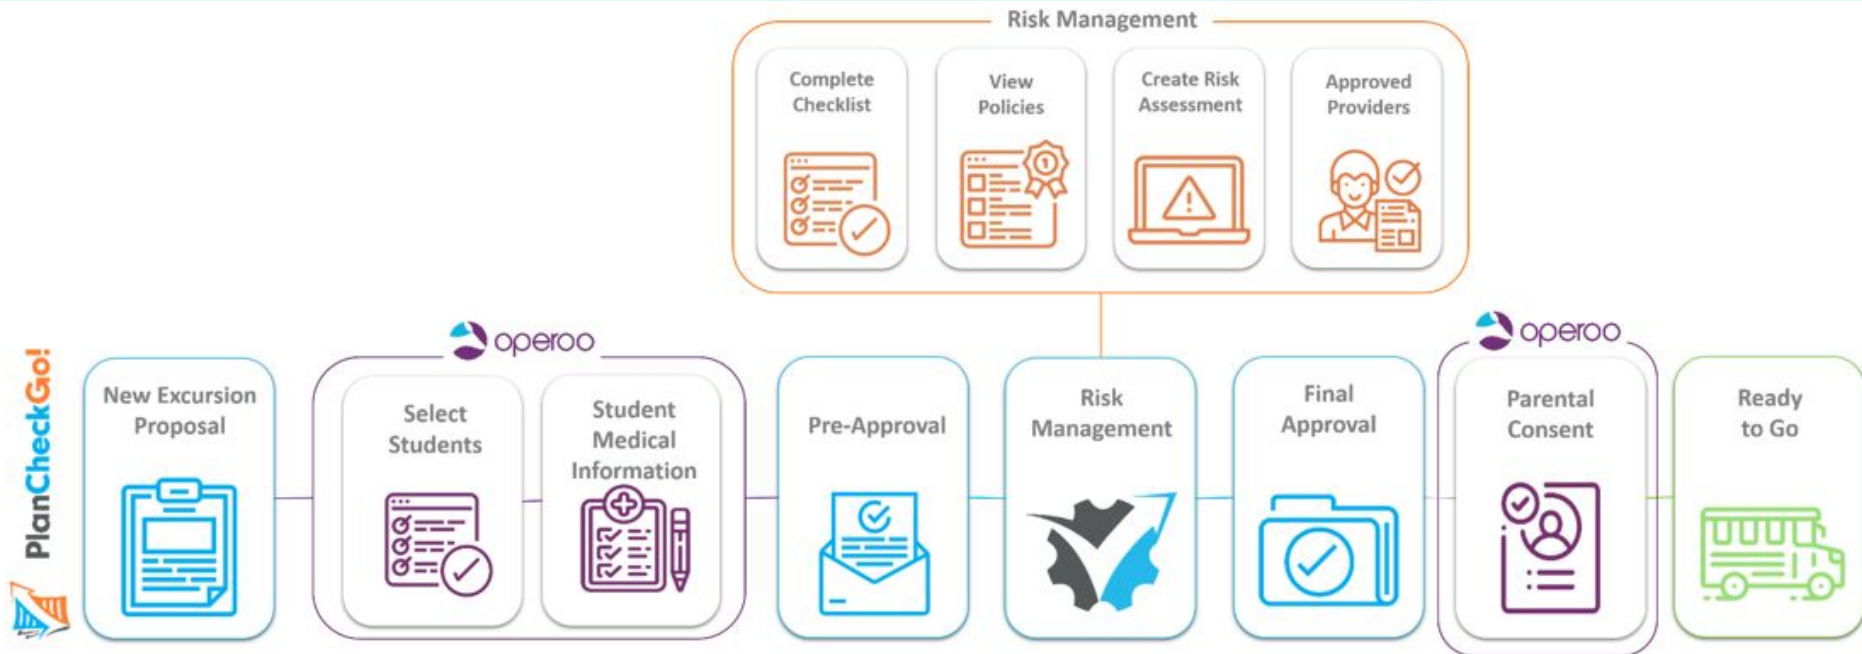

Streamlined communications, news & parent engagement

Manage and track incidents

Better Together

Your Guest Speakers

Barb King

Risk and Compliance Coordinator,
Thomas Carr College

Sharina Anthony

Administration Officer,
Thomas Carr College

Tim Farmilo

Deputy Principal,
St Andrews Christian College

Rebecca Bunyon

College Office Supervisor,
Heatherton Christian College

Heather Harrison

PA to Executive Principal,
Heatherton Christian College

Nathan Tomic

eLearning Coordinator,
Catholic Regional College
(North Keilor)

Challenges

Excursion and risk management

- What did your excursion and risk management processes look like before digitising them?
- What was it about how you used to plan, manage and oversee school trips that meant change was necessary?

Outcomes of digitisation

Efficiently meeting robust standards

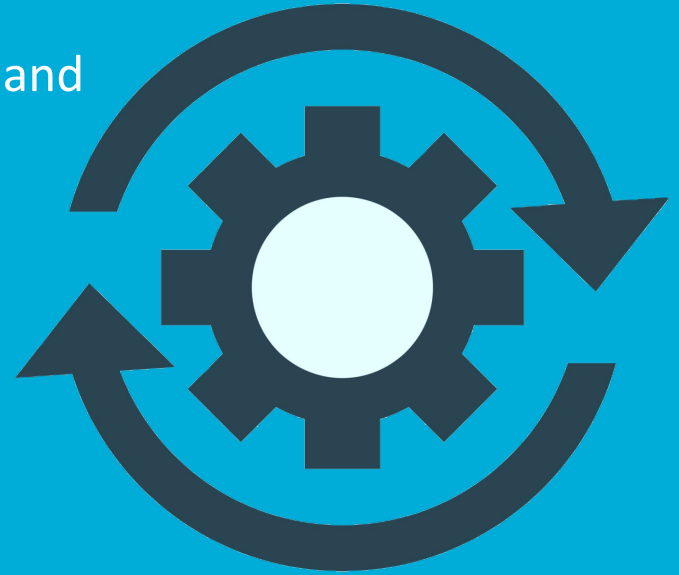

- How has digitising and automating your excursion & risk management practices benefited your school?
What past challenges have you overcome?
- Can you think of a specific time, incident or anecdote?

An integrated approach

For excursion and risk management

- Why was it important to be able to plan, run and review your excursion and risk management in a single integrated workflow?

Risk Appetite

Now and in the Future

- What changes have you made to your plans regarding school excursions in light of the pandemic?
Has the amount and type of risk that your school is prepared to take-on changed?
And, if so, do you envisage this having lasting impacts beyond COVID-19?
- What advice do you have for other schools looking to digitise and automate their excursion and risk management processes?

Demonstration

8 key takeaways for safe, paperless excursions:

1. Streamline excursion planning and internal approval processes
2. Generate pre-excursion risk assessments, checklists and provider due-diligence
3. Identify and mitigate COVID-related risks
4. Digitally distribute permission slips to defined student groups — in any language
5. Quickly collect consent, payments, medical data and action plans from parents
6. Automatically distribute and collect customizable COVID-19 Health Check-In Forms
7. Conduct real-time parent comms and emergency management from any device
8. Capture feedback for future planning and keep confidential student data secure

Q&A Session
